EXAMINER'S COMMENT

1. The oath or declaration is defective because:

Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

This application will not be passed to issue until a new declaration is submitted with (a) a statement acknowledging the duty to disclose material which occurred between the filing date of the prior application and the continuation-in part application, and (b) continuing data that matches the priority claimed in paragraph 1 of page 1 of the specification. See M.P.E.P. § 605.04, filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

2. The following is an examiner's statement of reasons for allowance:

The claimed nucleic acid is novel, because the art does not teach or suggest the nucleic acid SEQ ID NO:11, or a nucleic acid encoding the polypeptide SEQ ID NO:12.

The claimed nucleic acid is enabled, because the sera of melanoma or lung cancer patients treated with autologous cancer cells has antibody reacting against the encoded polypeptide SEQ ID NO:12, higher than that of normal controls (the instant specification, p.32, last paragraph, bridging p.33 and figure 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
